DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims, 7-9, 24-30, 53-67, 86-97, 103-107 drawn to a method, classified in class 451, subclass 41.
 - II. Claims 1-6, 10-23, 31-52, 68-85, and 98-102, drawn to a combination classified in class 451, subclass 011.
 - III. Claims 108-113, drawn to a subcombination, classified in class 451, subclass 402.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require a cup ascending-and-descending mechanism operatively connected to said load-and-unload cup and said arm, said cup ascending-and-descending mechanism being configured to raise and lower said load-and-unload cup with respect to said arm. The subcombination has separate utility such as a load/unload cup in electro-chemical wafer plating device.

Art Unit: 3723

3. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus or by hand, because the apparatus does not require apparatus does not require sequential operation of the object relay devices/load-unload cups.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Claims 68, 86, 98, and 103 are generic to a plurality of disclosed patentably distinct species comprising:

- species 1, figure 1;
- species 2, figure 6;
- species 3, figure 7;

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Art Unit: 3723

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to M Rachuba whose telephone number is (571) 272-4493. The examiner can normally be reached on Monday-Thursday from 8:30 AM to 3:30 PM.
